

CHARACTERISTICS

TRAINING

- A traditional training device, the effectiveness of which depends on:
 - the teaching provided,
 - the technical expertise passed on.
- Theoretical and practical classes provided for:
 - operators, supervisors and maintenance technicians,
 - customer trainers in charge of enhancing this expertise amongst teams on the ground.

COACHING

- Observe, analyse and advise
- Reassure, motivate and support the operators as they take their first steps using a new system
- Improve the performance of operators and technicians
- Handing over to customers to ensure their full and complete autonomy

IN BRIEF

As soon as teams receive the right kind of training, it becomes easier to operate a solution. That's why SOLYSTIC provides courses for operators and maintenance operators, as well as for people who train its customers. In addition, SOLYSTIC offers coaching to support trainees as they start using new equipment and can also help its customers in change management.

BENEFITS

- Courses are prepared and personalised according to requirements and the language of the country
- On-site training using the equipment
- Educational and informative materials - composition and maintenance manuals, produced in close collaboration with specialised technical teams
- Proven methodology and expertise going back 25 years
- Coaching is a support service for the implementation of solutions. It enables the customer to benefit from SOLYSTIC's long experience, acquired internationally.

REFERENCES

- On-site training provided in France, Spain, United Kingdom, Portugal, Norway, Belgium, Netherlands, Sweden, Australia, etc.
- Training in the use of MARS machines - more than 950 hours (9,200 trainee hours) across all projects
- Coaching: in Belgium, 360 hours provided for teams.
