- Sizing and fine analysis of the requirement
 - analysis of the input and output mail flows
 - including customer operational requirements and constraints
 - production of detailed specifications
 - selection of the best solution, including products from third-party suppliers as well as SOLYSTIC
- Use of the latest generation of simulation and modelling tools such as SOSi™
- Definition of the project working closely with the client in order to ensure the best solution for the client
- Use of planning tools
- Support and optimisation, performance assessment, continuous improvement
- Management of the migration and commissioning process
- Creating partnerships, for example to set up IT infrastructures or building works
- Delivery of the complete solution

IN BRIEF

With the benefit of more than 60 years of experience in postal automation, SOLYSTIC also uses its many internationally-recognised areas of expertise for supplying turnkey solutions, from the most simple to the most complex.

BENEFITS

- The client is able to focus on managing its core business while SOLYSTIC manages the rest
- SOLYSTIC™ expertise gained over diverse projects applied to deliver a complete service
- A modular proposition adapted to your requirements, covering everything from the reorganisation of a sorting centre to the creation of a complete network
- Definition of the process, implementation and management of the solution
- The best skills and technologies available in the market, brought together under the authority of a single project manager, SOLYSTIC
- Project management is simplified for the customer (one point of contact)
- Guarantee of a consistent and coherent overall solution.

REFERENCES

- France: Roissy Hub for processing international mail
- Belgium: delivering a network of 4 new sorting centres, including responsibility for the construction of buildings and the migration to the new organisation from the existing Brussels X site. This project is supported by a complete maintenance contract - which also covers the building - with a commitment to deliver a specified Service Level Agreement (SLA)
- Finland: delivery of a full network made up of 4 sorting centres - Helsinki, Tampere, Oulu and Kuopio
- Norway: turnkey system for reading and coding.
